

# FACESHIELDS

## Canadian Manufacturer Steps - up to Help in the Fight Against COVID -19

Innovative Automation Inc. of Barrie, Ontario is producing faceshields and has inventory available for any business or institution.

Kim Marshall, Finance and Resource Manager at Innovative, has shared the POST below. As a service provider to Innovative, InFuse is forwarding this post to ALL our client contacts so that, if needed, they can get the PPE they need from a quality Canadian source and help to protect their employees in the New Normal of the workplace.

Kim Marshall shared a post: Over the years I've taken on many roles here at Innovative. Today I'm donning my sales hat (that's a new one!) because I'm always excited to be able to do something to help our community. Our face shields are now available for sale to all! If you've been following our story, Innovative Automation Inc. made a quick pivot in March to begin producing face shields for our local hospitals. I'm proud to say we have shipped over 200,000 shields! We now have excess capacity and are filling lots of orders for retailers and manufacturers who are ramping back up and need to create some physical distance with a face shield. Thank you to everyone who has helped spread the word for us so far. Email

## OUR PART

We will be providing information about some of our other clients who have shifted their production to manufacture other forms of PPE or parts for equipment needed in the fight. This is a great time to recognize Canadian ingenuity and resourcefulness and we at InFuse are proud to put the news out there.
